## Proactive Obsolescence Management System
Digital Engineering Services

The New
POMS

PROACTIVE OBSOLESCENCE
MANAGEMENT SYSTEM

The POMS Suite is the leading software for obsolescence management in the nuclear industry, with data from 190+ worldwide nuclear units. It is a web-based software tool, that has been in operation for over 15 years, which centralizes obsolescence issue identification and solution sharing into a one standard nuclear industry platform.

Modernization **Process**	Search **At the center**	Find solutions **Faster**	Westinghouse's **Engagement**

Ongoing modernization in 2024: Full Database and User Interface redesign

Search at the center: 15x improved search speeds - Faster and more intuitive

Find solutions faster: 300k+ solutions included - Improved solution information

Westinghouse's Engagement: Continuous discovery of our customer's needs. Constantly improving the software and providing regular updates to its features

FIRST UPDATE RELEASED
3rd JANUARY 2024
