

WESTINGHOUSE IS

focused on nuclear technology.

WESTINGHOUSE ELECTRIC COMPANY LLC

Westinghouse Electric Company has a proven track record for providing the safest, most advanced and cost-effective technologies for the commercial nuclear power industry.

Our research and technology is the basis for nearly half of the world's currently operating nuclear power plants. Four units of the Westinghouse **AP1000** nuclear power plant design — the most advanced of its kind currently available in the marketplace — are now being constructed in China. The **AP1000** design also has been announced as the technology of choice for no less than 14 new plants planned for the United States.

Always looking to the future, Westinghouse is taking the next steps to develop even more advanced nuclear power options to meet the world's diverse energy needs. Westinghouse technology will help provide future generations with safe, clean and reliable electricity.
