

Westinghouse nuclear power plants
release zero
greenhouse gases
while producing electricity.

WESTINGHOUSE ELECTRIC COMPANY LLC

Greenhouse Gas-Free Electricity Production

Source: U.S. Energy Information Administration

Nuclear energy provides electricity for one out of every five homes and businesses in the United States without producing greenhouse gases. In fact, nuclear energy is a proven solution to climate change — accounting for 72% of greenhouse gas-free electricity production.

We need to develop all sources of clean electricity. And the Westinghouse **AP1000** nuclear power plant is the most advanced of its kind currently available in the global marketplace. Four **AP1000** units are now under construction in China, and the **AP1000** design is the announced technology of choice for no less than 14 new plants planned for the United States.

Westinghouse and its more than 15,000 global employees are always looking to the future, taking the next steps to develop even more advanced nuclear power options to meet the world's diverse energy needs. Westinghouse technology will help provide future generations with safe, clean and reliable electricity.

A Toshiba Group Company
