

MISSION

Westinghouse Women in Nuclear (W-WIN), is an association of Westinghouse Electric Company employees that:

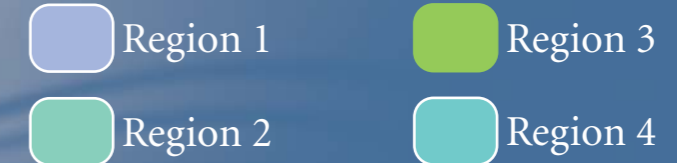

- Provides a network through which women in nuclear energy and nuclear technologies can further their professional development
- Provides an organized association through which the public is informed about nuclear energy and nuclear technologies
- Supports an environment in fields of nuclear energy and nuclear technologies in which both women and men can succeed

Westinghouse employees around the world are involved in WIN. In the U. S., employees typically join by location or region. In Europe and Asia, employees join by contacting one of our Westinghouse WIN coordinators.

U.S. WOMEN IN NUCLEAR

U. S. Women in Nuclear is divided into regions. Please see the map to determine your WIN region.

MEMBERSHIP

Membership in W-WIN is open to all Westinghouse employees who are interested in, or working in the fields of nuclear energy and radiation application who pledge to adhere to the mission and goals of the Charter.

GOALS

The goal of W-WIN is to objectively inform Westinghouse employees and the public about nuclear energy and radiation. This is accomplished by:

- Continuing to support Global, U.S., and Region chapters of WIN
- Providing communication channels between the W-WIN chapters, other WIN region chapters, customers, technical organizations, and professional organizations
- Offering support to WIN members who are striving for professional excellence by providing formal and informal mentoring and coaching opportunities, making presentations on technical topics and updates, communicating items of interest to working women, and providing guidance on continuing educational opportunities
- Working with education centers and community organizations to promote careers in engineering and nuclear technologies

HISTORY

WIN Global, an organization of over 2,000 professional women and men in 60 countries, was established in 1993 by a small group of women working in a variety of nuclear fields in Europe and the U.S. They were, and remain, interested in sharing their knowledge about nuclear technologies with women who are concerned about nuclear applications.

The 1999 WIN Global meeting in Washington D.C. attracted women and men from 43 U. S. organizations, including 27 electric utilities. From this meeting, the U.S. WIN group emerged.

Since 1999, the National Conference has been held annually in such places as Atlanta, Las Vegas, Pittsburgh, Tampa, San Antonio, and Chicago.

In 2003, U.S. WIN broadened its sphere of influence by inviting college students with majors in the technical studies relative to nuclear/radiation technologies to attend the conference. The students met and talked with professionals who work in fields that many of them will probably consider after college. For most of the students, the meeting was an important first step in developing a network of professional contacts.

Westinghouse WIN, Pittsburgh Chapter General Meeting

W-WIN ACTIVITIES

The W-WIN Pittsburgh Chapter sponsors several activities throughout the year:

- Introduce a Girl to Engineering (program targeted at local area female high school students that focuses on engineering, science, and the nuclear industry)
- Build a Better Future (interactive program with the local area Girl Scouts organization)
- Future Cities Competition (program designed to help 7th and 8th grade students understand the practical applications of mathematic and scientific principles)
- Take Your Child to Work Day (program includes hands-on activities focusing on planning and teamwork for 6th through 12th grade students)

For more information on these programs and additional opportunities for W-WIN involvement in the community, please visit our website or contact your W-WIN Pittsburgh representative.

MEMBERSHIP INFORMATION

If you would like additional information about the Westinghouse chapters of WIN, contact:
