

Pam Cowan

President, Engineered Systems & Solutions

Pam Cowan is President, Engineered Systems & Solutions at Westinghouse Electric Company. In this role, she leads the company's global efforts to drive strategic and tactical partnerships for utilities to maximize their plant's value while supporting general operations, deploying state-of-the-art Instrumentation & Control services, and partnering with customers to execute long-term asset management and optimization decisions.

Ms. Cowan joined Westinghouse in September 2021 as President of the Americas Operating Plant Services business unit, where she successfully led business development, sales and delivery for the existing nuclear operating plant customers across North and South America.

She has more than 30 years of experience in the nuclear industry. Before coming to Westinghouse, Ms. Cowan was Senior Vice President at Holtec International and Chief Operating Officer of Holtec Decommissioning International. Previously, she held a series of leadership roles at different nuclear utilities including Exelon Generation, American Electric Power and PSEG Nuclear. She also served as vice president of the Nuclear Generation Division and Regulatory Affairs at the Nuclear Energy Institute (NEI).

Ms. Cowan holds a bachelor's degree in nuclear engineering from the Georgia Institute of Technology and a master's degree in engineering management from Drexel University. She also was a licensed Senior Nuclear Reactor Operator.
