

Springfields Fuels Limited

Environmental Policy

Our environmental policy is to continuously improve our environmental performance and integrate recognised environmental management best practice into our business operations.

Our management team are fully supportive of the contents of this policy and are committed to ensuring that this policy is implemented across the life cycle of SFL's activities, products and services.

We will achieve this by:

- ❖ Ensuring that our activities, products and services are, as a minimum, in compliance with applicable Environmental legislation, and meet the requirements of good practice and applicable standards of Environmental performance
- ❖ Preventing environmental incidents and understanding the risks posed by the activities carried out by the site
- ❖ Ensuring an environmentally aware workforce suitably trained in the environmental aspects of Springfields Fuels Limited's activities and fully understand those aspects we can control and influence
- ❖ Applying Best Available Techniques to all our plants and processes.
- ❖ Maintaining our environmental management system to the standards set out in ISO 14001.
- ❖ Encouraging waste minimisation and promoting active employment of the waste hierarchy.
- ❖ Minimising use of natural resources and promoting energy efficiency
- ❖ Encouraging sustainable procurement throughout the business
- ❖ Proactively monitoring our environmental impact
- ❖ Measuring and taking action to reduce our carbon footprint
- ❖ Protecting the existing semi-natural habitat within the site boundary and optimising biodiversity within the constraints of business priorities.
