

Springfields Apprentice Training

Level 6 Cyber Security Degree Apprenticeship

If you have a genuine passion in technology and software with an interest to develop a career in engineering, then a cyber security degree apprenticeship at Springfields Fuels is ideal for you.

Working within one of our engineering departments, you should be self-driven with an ambition to develop towards being able to solve technical and human problems relating to the use of technology systems, develop the ability to analyse requirements and information from a variety of sources and build a professional profile.

You must have the ability to work on your own initiative and also cooperate effectively as a team member. Throughout the apprenticeship you will have the opportunity to develop your knowledge and practical skills with a broad range of technologies.

What You Will Require

We're looking for bright, enthusiastic and driven candidates who can contribute to the success of Springfields.

We welcome applicants from all backgrounds and all eligible applicants will ideally have

- 3 A Levels with at least one qualification in Maths or a Science/Technology subject.
- 5 GCSE passes at grade A*-C (or levels 9-4), including Maths and English. Alternatively, a BTEC in an Engineering or Technology based subject is suitable.
- Prior work experience would be considered on a case by case basis.

As part of your apprenticeship, you will earn an apprenticeship salary and will undertake the necessary training to complete a qualification at University of Central Lancashire which is delivered on a day release basis.
