

Carbon Reduction Policy

Our policy sets out WEC UK strategic commitment to enabling a low-carbon society through the management and reduction of carbon through the use of innovation and robust initiatives within our business.

Climate change is recognised as a long-term threat to human prosperity and our way of life. Science has demonstrated the importance of taking action now. WEC UK realise the way in which we operate within our business sector requires significant change in order to enable us to respond to this challenge. As such, effective management and reduction of greenhouse gas emissions have become key to our business sustainability strategy.

This policy supports the existing WEC UK Environmental and Sustainability Policy and describes our commitment to reducing our carbon footprint and working with our clients and suppliers to reduce the impact of our activities on the wider environment.

We shall seek to actively reduce our use of energy and emissions arising from our operations and within our supply chain.

To affect our policy WEC UK shall focus our efforts on the following key elements:

- ❖ Carbon Emissions from business travel associated with the business unit.
- ❖ Carbon emissions resulting from our business offices; and
- ❖ Working with our clients and supply chain on reducing their energy use and emissions.

Our policy will be delivered by:

- ❖ Accurately measuring and reporting our carbon footprint and remaining committed to broadening the scope of measurement through continuous improvement.
- ❖ Generating a culture that places low carbon working practices at the heart of our business process through the provision of robust data and informed decision-making tools; and
- ❖ Enabling and actively encouraging our employees, our supply chain and our stakeholders to engage in activities focused on the reduction of our carbon footprint.

Westinghouse Electric Company UK Ltd is operating in accordance with the standards defined in the global Westinghouse Management System structure, which is comprised of a Quality Management System (QMS), Environmental Health and Safety Management System (EHSMS) and Business Management System (BMS).
