

# Configuration Management Interface System – 10CFR50.59/72.48 Module

## The Westinghouse Solution

The Configuration Management Interface System (CMIS)<sup>TM</sup> is a paperless, web-based solution to implement and manage engineering deliverables for the nuclear industry. The main feature of the application is CMISDP (Design Process), which implements the U.S. Standard Design Process (IP-ENG-001).

The CMIS<sup>TM</sup> 10CFR50.59/72.48 Licensing Module provides a robust, up-to-date software solution for the preparation and review of engineering documents, allowing for the self-approval of changes to the facility (as defined by the FSAR for the plant/ISFSI installation). The module is available within the CMIS<sup>TM</sup> application and integrates with CMISDP to link 10CFR50.59/72.48 reviews to the parent engineering change.

**Standard 50.59/72.48 Form Header within the CMISDP**

**Leverages existing CMIS functionality: revision control, electronic signatures, submit to records**

**Digital format facilitates cloning of existing licensing evaluations for improved efficiency**

**CMIS<sup>TM</sup> Forms – Similarly, other utility-specific forms/processes can be integrated into CMIS<sup>TM</sup>**

**Utility configured questions to handle customizations, including response types**

**Form Inputs**

I. List LDCR Nos. associated with the proposed activity:

Address the questions below for all aspects of the proposed activity. Apply the identified Note that it is not unusual to have more than one process apply to a given proposed activity. See Section 4 of the 10 CFR 50.59 Resource Manual (RM) for additional guidance.

II. Does the proposed activity involve impacts to:

- 1. Technical Specifications or Operating License?**  
(10CFR50.90) [Station per STA-116]
- 2. Quality Assurance Program?**  
(10CFR50.54(a)) [Station per STA-116]
- 3. Security Plan?**  
(10CFR50.54(p)) [Station per STA-116]
- 4. Emergency Plan?**  
(10CFR50.54(q)) [Station per STA-116]
- 5. IST Program Plan?**  
(10CFR50.55a(f)) [Station per STA-116]
- 6. ISI Program Plan?**  
(10CFR50.55a(g)) [Station per STA-116]
- 7. Fire Protection Program (See Applicable License Condition?)**  
[Station per STA-116]
- 8. Other Technical Specification Controlled Programs (e.g., ODCM)?**  
[Process per procedure(s) appropriate for activity]
